Journal of Elasticity

Contents of Volume 32 (1993)

Vol. 32 No. 1 July 1993

M. Ciarletta and A. Scalia: On uniqueness and reciprocity in linear thermoelasticity of materials with voids 1

V.A. Lubarda: On the elastic strain energy representation of a dislocated body and dislocation equilibrium conditions 19

D. De Tommasi and S. Marzano: Small strain and moderate rotation 37

H. Cohen and G.P. MacSithigh: Plane motions of elastic pseudo-rigid bodies: an example 51

Q. Jiang: On the modeling of thermo-mechanical phase transformations in solids 61

Vol. 32 No. 2 August 1993

A. Karwowski: Dynamical models for plates and membranes. An asymptotic approach 93

S. Bennati, S. Degl'Innocenti and C. Padovani: On the sign of the internal stresses in a problem of plane elasticity 155

Vol. 32 No. 3 September 1993

Y.-C. Chen and L. Wheeler: Derivatives of the stretch and rotation tensors 175

K.Ch. Le and H. Stumpf: The singular elestostatic field due to a crack in rubberlike materials 183

Classroom note

J. Sarli and J. Torner: Representations of $\mathbb{C}$, biharmonic vector fields, and the equilibrium equation of planar elasticity 223

Research note

N. Phan-Thien: Rigid Spherical inclusion: the multipole expansion 243

Kluwer LaTeX style file: Instructions for authors 253
